We Do It Right

Creating the Essential Storefront for the Wellness Center

The local YMCA of the Hermantown, MN area was looking to do a partial remodel of their building storefront. They reached out to St. Germain's Glass to assist with the project and improve the look and feel of the old building.

THE CHALLENGE

A partial remodel was required on an old existing Middle School building, as well as an entirely new addition to the structure. The YMCA needed someone to complete the full scope of work at the most competitive price.

OUR SOLUTION

After extensive communication with the client, St. Germain's Glass scoped out a plan for a complete renovation of the structure. Additionally, St. Germain's Glass was able to provide the Wellness Center with an aluminum store front, a glass curtain wall, and an aluminum interior as well as insulated glass and glazing services.

RESULTS ACCOMPLISHED

St. Germain's Glass got the job done and the Hermantown area now has a beautiful new YMCA health center to service their community for years to come.

Why was Brin Glass best suited for the work?

With St. Germain's Glass location close to the Hermantown area, one-on-one support and quick communication made it easy to complete the job at the most competitive price. St. Germain's Glass also has the care, experience, and capability to do the full scope of work in a timely matter.

"St. Germain's Glass was honored to partner with both Essentia Health and McGough Construction on this project. The look of the building is modern and slick and serves the community in the exact way they needed." – Denny Nelson, General Manager at St. Germain's Glass
